SUMMARY

Backend-focused Software Development Engineer with hands-on experience building scalable APIs, optimizing system performance, and executing large-scale migrations. Proven ability to reduce latency, improve system reliability, and deliver production-grade solutions using Golang, PostgreSQL, and modern web technologies. Strong foundation in data structures, system design, and problem solving.

EXPERIENCE

Busy Infotech Pvt. Ltd. — Software Development Engineer I

Jan 2026 – Present

- Led migration of legacy VB .NET APIs to Golang, improving system performance and scalability
- Designed and developed 25+ REST APIs, with 15+ successfully deployed to production
- Reduced API response latency by ~200–250 ms through optimized business logic and database queries
- Executed database migration from MySQL to PostgreSQL, ensuring data integrity and query efficiency
- Implemented centralized logging using Kibana, improving debugging and monitoring capabilities
- Ensured high reliability by handling edge cases and conducting rigorous testing, achieving zero production failures
- Authored detailed API documentation, reducing onboarding time for new developers
- Contributed to development of a GST-focused platform aimed at supporting MSMEs

Busy Infotech Pvt. Ltd. — Software Development Intern

July 2025 – Dec 2025

- Diagnosed and resolved issues in .NET-based systems, improving system stability
- Assisted in API and database migration to PostgreSQL
- Designed database schemas and optimized queries for performance improvements
- Learned and applied Golang, PostgreSQL, and Git in production environments
- Demonstrated rapid learning ability, transitioning to a new tech stack within 3 months

The ReTail Project — Web Development Intern

Feb 2025 – June 2025

- Collaborated with cross-functional teams to gather and analyze client requirements
 - Built responsive user interfaces using React.js
 - Integrated frontend with Firebase for authentication and real-time data handling
-

PROJECTS

EcoCart – E-commerce Platform

- Built a full-stack e-commerce platform using React and Firebase
- Implemented secure authentication and real-time product updates using Firestore
- Optimized data fetching and UI rendering for improved user experience
- Live: <https://ecom-ecocart11.vercel.app/>

Master Tutor – Online Learning Platform

- Developed a scalable tutoring platform with real-time updates
- Designed interactive UI and authentication system using Firebase
- Live: <https://tanisharao2002.github.io/Mastertutor/>

Library Management System

- Built a cloud-based system to manage book inventory and user transactions
- Implemented search, authentication, and borrowing workflows
- Live: <https://library-management-nine-neon.vercel.app/>

ChatGroup – Real-Time Chat Application

- Developed a public chat system with real-time messaging using Firebase
 - Implemented core chat features including message sync and user interaction
 - Live: <https://tanisharao2002.github.io/chatGroup/>
-

SKILLS

Languages: C++, JavaScript, Golang

Backend: Node.js, Express.js, REST API Design, Firebase

Frontend: React.js, HTML, CSS

Databases: PostgreSQL, MySQL, MongoDB, Firestore

Tools: Git, GitHub, Kibana

CORE COMPUTER SCIENCE

Data Structures & Algorithms | DBMS | Operating Systems | Computer Networks | System Design Basics

EDUCATION

Master of Computer Applications (MCA) — G.G.S.I.P.U., New Delhi

2023 – 2025 | CGPA: 9.6

Bachelor of Computer Applications (BCA) — M.D.U., Rohtak

2020 – 2023 | 75.9%

ACHIEVEMENTS & CERTIFICATIONS

- University Rank Holder (10th Rank) – MCA 2025
 - Institute Rank Holder (1st Rank) – MCA 2025
 - 1st Position – Web Weavers, TechnoSapiens 2025
 - 1st Position – UI/UX Designing, TechnoSapiens 2024
 - Full Stack Web Development Training – AcmeGrade
 - Introduction to AI & ML – Google Cloud (Coursera)
 - Generative AI: Introduction and Applications
 - Build with Claude API
-

ADDITIONAL

- Strong problem-solving skills with focus on scalable backend systems
- Experience working in production environments and handling real-world engineering challenges
- Passionate about building impactful and efficient software systems
